

EXECUTIVE SUMMARY

On June 28, 2001 the Division received a Title V application to operate a military installation in Frankfort, Kentucky from Kentucky Department of Military Affairs, Boone National Guard Center. The facility was formerly permitted under state origin permit number S-96-068. The Division did not take action on this application. On June 26, 2002 the Division received a letter from the source requesting that the application be changed to a Federally Enforceable State Operating Permit application. A review of the applications was undertaken in June of 2005. The review resulted in a request for additional information. Additional information pertaining to the painting operations and metal degreasing operations at the installation was received on July 21, 2005. A letter requesting specific emission limits on HAP and VOC emissions below major source thresholds was received on August 10, 2005. The applications are processed under Activity ID number APE20040002.

The issuance of a Federally Enforceable State Operating Permit (FESOP) requires a preliminary determination and public notice. This has been done by the Division. An advertisement was placed in the *The State Journal*, Frankfort on September 30, 2005. The thirty-day comment period expired on October 31, 2005.

COMMENTS

The Division received a letter from the Kentucky Department of Military Affairs, Boone National Guard Center on October 12, 2005 in regard to a minor modification to the draft permit, permit number F-05-030. The comments are as follows:

“Since the original application of the above referenced permit, boilers have been removed and replaced with forced air units at two locations on Boone Center. Lines 4, 5 and 6 of Section C (insignificant activities) have been removed. The USPFO building is now heated with (7) 0.12 MMBTU/HR ceiling mounted forced air units and the CSMS building is now heated with (16) 0.12 MMBTU/HR ceiling mounted forced air units.”

The permit has been updated to reflect these changes.

In conclusion, a thorough analysis has been made of all relevant information available, which pertains to this application. The Division has concluded that compliance with the permit will assure compliance with all air quality regulations and requirements.
